Skill specific	Teachers choice. Pick a lesson/topic/skill you most like to teach in order to build relationships with your class. Aim for accessible skills which will deliver success to students. Frequency trees, 2-way tables, Venn diagrams is a good example.	<b>Stem &amp; leaf</b> - Draw and interpret stem & leaf diagrams. - Mean, median, mode, range. - Probability.	<b>Pie charts</b> - Draw and interpret a pie chart (use ratio diagram; degrees : data)	<b>Venn diagrams</b> - Venn diagrams and probability. - Intersect, union, and complement (not) notation.	<b>Direct and inverse proportion</b> - Direct proportion ( $a = kb$ ). - Inverse proportion ( $a = k/b$ ). - Roots and powers, worded and contextual questions.	<b>Constructions, loci, plans &amp; elevations</b> - Draw the front elevation, side elevation or plan of a 3D shape. - Construct the perpendicular bisector of a line. - Construct the bisector of an angle. - Construct a triangle given 2 angles and a side (ASA).	<b>Catch-up, repair, revise, assess.</b>	<b>MOCKS</b>  <b>MOCKS</b> 1 x full GCSE paper (calculator) 1 x full GCSE paper (calculator)	<b>MOCKS</b>  <b>MOCKS</b> 1 x full GCSE paper (calculator) 1 x full GCSE paper (calculator)

Skill specific	<b>Transformations</b> - Translation: on a coordinate grid; use a column vector to describe a translation. - Reflection: draw a reflection in a mirror line; draw reflections on a coordinate grid; describe reflections on a coordinate grid. - Rotation: rotate on a coordinate grid; describe a rotation. - Enlargement: enlarge by a scale factor; enlarge with a centre of enlargement. - Describing enlargements: identify scale factor; find the centre of enlargement; describe fully. - Combining transformations: transform using more than one transformation; describe combined transformations on a grid.		<b>More algebra</b> - Graphs of cubic and reciprocal functions: draw and interpret graphs of cubic functions; draw and interpret graphs of $y=1/x$ . - Non-linear graphs: draw and interpret non-linear graphs to solve problems. - Solving simultaneous equations graphically: solve simultaneous equations by drawing a graph; write and solve simultaneous equations. - Rearranging formulae: changing the subject of a formula. - Proof: identify expressions, equations, formulae and identities; prove results using algebra.		<b>Congruence, similarity and vectors</b> - Similarity and enlargement: understand similarity; use similarity to solve angle problems. - More similarity: find the scale factor of an enlargement; use similarity to solve problems. - Using similarity: understand the similarity of regular polygons; calculate perimeter of regular shapes. - Congruence 1: recognise congruent shapes; use congruence to work out unknown angles. - Congruence 2: use congruence to work out unknown sides.		Use remaining time to target high value topics you have identified as requiring strengthening.  At least one lesson per week should be given over to exam practise (use past papers, aiming for, topic papers, etc.).  Topics SUGGESTED high value topics starting with those covered the longest time ago.
